Other tips and relevant	information
Other tips/relevant information	Be prepared for the variable standard of accommodation in communities. A sleeping bag sheet insert is a good idea for protection against biting insects.
	Whenever possible, avoid being on the road from dusk till dawn. Apart from the unfenced cattle station, the region has a population of feral horses, donkeys, dogs and the occasional camel along with a native population of Kangaroos and Dingoes. All of which are a significant road hazard.
	On arrival, please check with the Health Centre to understand any health or social issues within the community. They can also let you know of any sacred sites to avoid.
